

*What's the most rewarding part of your job?  
"Seeing the kids walk into a brand new turned over area. So not so much the renovation, more just turning over the new areas." - Mr. Bowers*

*Is there anything else students should look forward to in the short term?*

*"You guys should take advantage of watching from beginning to end because it's a very amazing process when you go from a flat piece of ground to a finished product... take advantage of what you can watch in the process as it goes through."*

*- Mr. Bowers, FCPS Design and Construction*

*This is one of the new science rooms. It is enormous, boasting eight sinks, a wash station, and access to a prep room that is probably three times the size of an old prep room.*
